

The Aermotor Co.

Dear Windmill Enthusiast,

Thank you for visiting The Aermotor Company website. We are proud to still be manufacturing the finest windmill in the world. Since 1888, the Aermotor Windmill has served the world fresh water.

The Aermotor Windmill uses the finest grade of steel and ductile iron in our castings, and each windmill is assembled at our manufacturing facility in San Angelo, Texas.

We are 100% American ... MADE IN THE USA ...

If you are looking for a cheap windmill, you can find a foreign-made windmill that is priced less than the Aermotor Windmill. We will not compromise our quality for the sake of price.

The Aermotor Co. has more than 500 dealers throughout the world selling and servicing our windmills. I would be proud to put you in touch with one of these dealers.

I hope you enjoy our website. If you have any questions about The Aermotor Co. or our product, please send us an e-mail ... aermotor@wcc.net ... or call us toll free at (800) 854-1656.

Respectfully yours,

Bob Bracher, President
